

## EDUNAV SUMMIT

# Automated degree and credential completion analysis

Every institution tracks student progress against declared goals, but nearly all of them report this is a time-consuming, inefficient and imprecise process. Worse, no institution has found a way to easily compare their students' progress against undeclared goals.

**Until now.**

**EduNav Summit is the only solution able to track and manage all students against all credentials and degrees.** EduNav Summit automatically compares each student's unique academic history to the requirements, courses and prerequisites for every program offered by your institution. Summit can be deployed and be delivering value in only a few months.

EduNav Summit offers unparalleled visibility into your students' academic progress and will empower you to drive completion rates to new levels.

Eliminate manual work.  
Improve student retention.  
**Complete more students.**

## About EDUNAV

EduNav helps students achieve their academic and career potential. Our SaaS solutions enable colleges and universities to graduate more students in less time. EduNav's patented, groundbreaking technologies automatically identify more effective pathways to degree completion, unlocking employment opportunities and growing students' earning potential. As a result of improved student retention, completion and proprietary analytic intelligence for Administration, we increase operational efficiency for institutions and academic and employment equity for their students.
